Online Audio Class Instructions

+ Overview

This PDF is going to teach you how to stream audio directly from your session (either in Pro Tools or Logic) and receive real-time feedback from your instructor.

Here you can book your online class and choose your instructor:

<https://www.studio42brooklyn.com/online-classes>

+ The Audiomovers Plug-in

In order to stream your audio in high quality, you will need to sign up and download the Audiomovers plug-in from here <https://audiomovers.com/downloads/>.

Create and confirm your account via email then proceed to download the plug in.

Don't forget to confirm your email address or else the plugin will not work.

How to install the plug in :

STEP 1. After downloading the installer, open your system preferences and click on Security & privacy

STEP 2. Unlock permissions , leave this window open and accessible

STEP 3. Run the installer

+ Pro Tools

STEP 1. Create a "Master Fader" stereo track by selecting Track > New... in the toolbar. This track is where all your audio/midi tracks will be routed, creating an unified stereo output. Make sure settings are exactly as shown:

STEP 2. Add the Audiomovers "Listento" plug-in to the very last slot in your Master Fader inserts section.

STEP 3. Open the plug-in window and log in to start streaming

The screenshot shows the Listento plugin window in a DAW. The interface includes a login section with fields for 'USER NAME' (vitorhirtsch) and 'PASSWORD' (*****), a 'Log Out' button, and a 'Login Status' of 'Logged in'. Below this is a 'Session Name' field set to 'Mixing Lesson' and a 'Copy Link' button. A dropdown menu for 'AAC 96 KBit/S' is open, showing options: AAC 320 KBit/S, AAC 256 KBit/S, AAC 192 KBit/S, AAC 128 KBit/S, AAC 96 KBit/S (checked), PCM 32 bit, PCM 24 bit, and PCM 16 bit. At the bottom, a purple 'Start Transmission' button is visible. The background shows the DAW's mixer with tracks for 'Iridium.dp1', 'Guitar 2', 'Delay', and 'Master 1'.

1. LOG IN

2. Select audio quality

3. Copy link and send it to instructor via Zoom chat

4. Start streaming
